

The below step-by-step guide has been created to help with the initial set-up of the ROLA high mod POS display at Anaconda. Please follow the installation guide steps carefully too help ensure each store presents the ROLA merchandise in a consistent and clear manner.

**Step 1**

Clear the allocated High mod bay of any existing stock and hanging hooks. Unwrap supplied display packaging items ready for installation.

**Step 2**

Select the 2 X 3mm white coreflute panel and fold flat. Position to rear side of cage rear wall and fix with 8 X black cable ties. *(Note: Panels to be stacked ontop of each other).*

**Step 3**

Find the side blade graphic panel with the 4x4 red car lifestyle image printed both sides; along with 5 X black cable ties.

**Step 4**

Position the panel to the left side cage wall and fix into position using the 5 X black cable ties onto the mesh wall *(4 x outer edges and 1 x centre point).*

**Step 5**

Find the side blade graphic with the ROLA Difference Headline text and 6 X roof rack variety images; along with 5 X black cable ties.

**Step 6**

Position the panel to the top right side cage wall and fix into position using the 5 X black cable ties onto the mesh wall trimming cable ties per step 4.

**Step 7**

Trim off all excess cable tie lengths and keep display neat and tidy. Trim cable tie to head too avoid sharp exposed edges.

OR

**Step 8**

Find the header card with ROLA & Anaconda branding along with 4 X black cable ties or 2 X T Bar magnetic clips.

**Step 9**

Header card can be fixed to rear mesh wall via black cable ties 4 X outer edge corners. Trim excess as required.

### Step 10 (Alternative Fixing)

Alternative fixing method is via the floating shelf bar and the heavy duty magnetic T Grips. The floating shelf bar can be bought forward in some instances if required.

### Step 11

Referencing the planogram image below; position the 1500mm high Titan Tray Product into position back left corner, with 1200mm Titan Tray product variety to sit directly in front.

### Step 12

Position Items 3-8 on the Planogram table into upper right section of wire cage using the 250mm mm variety hanging hooks.

(Note: It is critical 250mm hanging are used here to ensure Right side blade graphics content is visible)

### Step 13

Position remaining product on the rear cage mesh using the 350mm hanging hooks. Reference Planogram image below for accurate placement locations.

(Note: Heavier product items a maximum of 2 X product units per hanging hook can be displayed).

### Step 14

Position 2 X Rooftop Cargo bags bottom right corner of cage facing outward. Avoid stacking if possible to maximise brand visibility.

### Step 15

Clean up unwanted packaging and ensure final product display is presented in the best possible manner for ROLA and Anaconda.

## Product List & Planogram

REF	ITEM CODE	DESCRIPTION	L	W	D	KG
